PRU Positive Registration Unit

This innovative system was developed to allow a quick pre-registration of the film positives in the screen, reducing set-up times.
Compatible with conventional and retensionable screens of various dimensions.
Film placement can be adjusted using LED positioning lights.

1. for SR system frame support (optional)
2. for U clamp frame support (optional)
3. for Pin system support for Newman frames (optional)
4. for Pin system support for static frames (optional)
5. for Unireg frame suport (optional)
